PROTECTION. PREVENTION. COMPLIANCE

WHO WE ARE

Welcome to Elite Joinery & Fire Protection

Based in Glasgow and serving clients across the UK, Elite Joinery & Fire Protection is committed to **safeguarding lives and property** through industry-leading fire safety solutions.

We specialise in fire doors, fire stopping, inspections, maintenance, installation, and fire risk assessments, delivered by a highly qualified team accredited by BM TRADA.

Our mission is simple: **Prevent. Protect. Secure.**

We provide every client with **tailored, compliant, and fully certified fire protection** services that meet the highest industry standards.

WHY FIRE SAFETY MATTERS

- Fire safety is a legal and moral obligation across all commercial and residential environments.
- Strict fire safety regulations exist to protect lives, assets, and business continuity.
- Non-compliance exposes organisations to serious legal, financial, and reputational risk.
- Passive fire protection failures allow fire and smoke to spread rapidly and uncontrollably.
- These failures increase structural damage, compromise escape routes, and raise risk to life.
- Elite Joinery & Fire Protection takes a proactive, compliance-first approach to ensure peace of mind.

OUR ACCREDITATIONS

BM TRADA Certified
Across All Services
We are proud to hold
BMTRADA Q-Mark
third-party
accreditation for:

- **Fire Door Inspection**
- **Fire Door Maintenance**
- **Fire Door Installation**
- **Fire Stopping Installation**
- **Fire Risk Assessment**

These accreditations guarantee that our work adheres to **BS 8214:2026** and **Fire Safety Act Scotland 2005**

ENSURING YOUR FIRE DOORS ARE FIT FOR PURPOSE

Fire doors are critical in slowing the spread of heat, fire, and smoke, providing valuable time for evacuation. Regular inspections are legally required to ensure they function properly and meet regulatory standards. We carry out comprehensive inspections across:

**Commercial
buildings**

**Residential
blocks**

**Care
homes**

Hotels

**Hospitals
and schools**

**Industrial
facilities**

**Student
accommodation**

Our certified inspectors provide detailed reports, identifying compliance issues and recommending remedial works to keep your buildings safe.

MAINTAINING THE INTEGRITY OF YOUR FIRE DOORS

Fire doors must be maintained in strict accordance with manufacturer guidelines and recognised industry standards to ensure reliable performance in the event of an emergency. Effective maintenance is essential to preserving fire resistance, protecting escape routes, and maintaining full regulatory compliance.

Elite Joinery & Fire Protection provides a comprehensive fire door maintenance service that includes the precise adjustment of

door closers and hinges, the repair or replacement of seals and intumescent materials, and remedial works to damaged door frames or leaves. All maintenance is completed in full alignment with **BS 8214:2026** requirements.

As a BM TRADA-accredited provider, our team ensures every fire door remains fully operational, compliant, and ready to perform when it matters most.

ENGINEERED FOR COMPLIANCE INSTALLED FOR PROTECTION

Even the highest-quality fire doors will fail to perform if they are not installed correctly. Improper installation compromises fire resistance, allows the spread of smoke and flames, and places both lives and property at unnecessary risk.

Our specialist installers ensure every fire door is installed in full compliance with British Standards, using certified fire door sets and approved ironmongery. Precise attention is given to sealing, clearances, and tolerances to ensure verified fire resistance performance in real-world conditions.

Every installation is fully certified, providing complete assurance that each fire door will operate exactly as required in the event of an emergency.

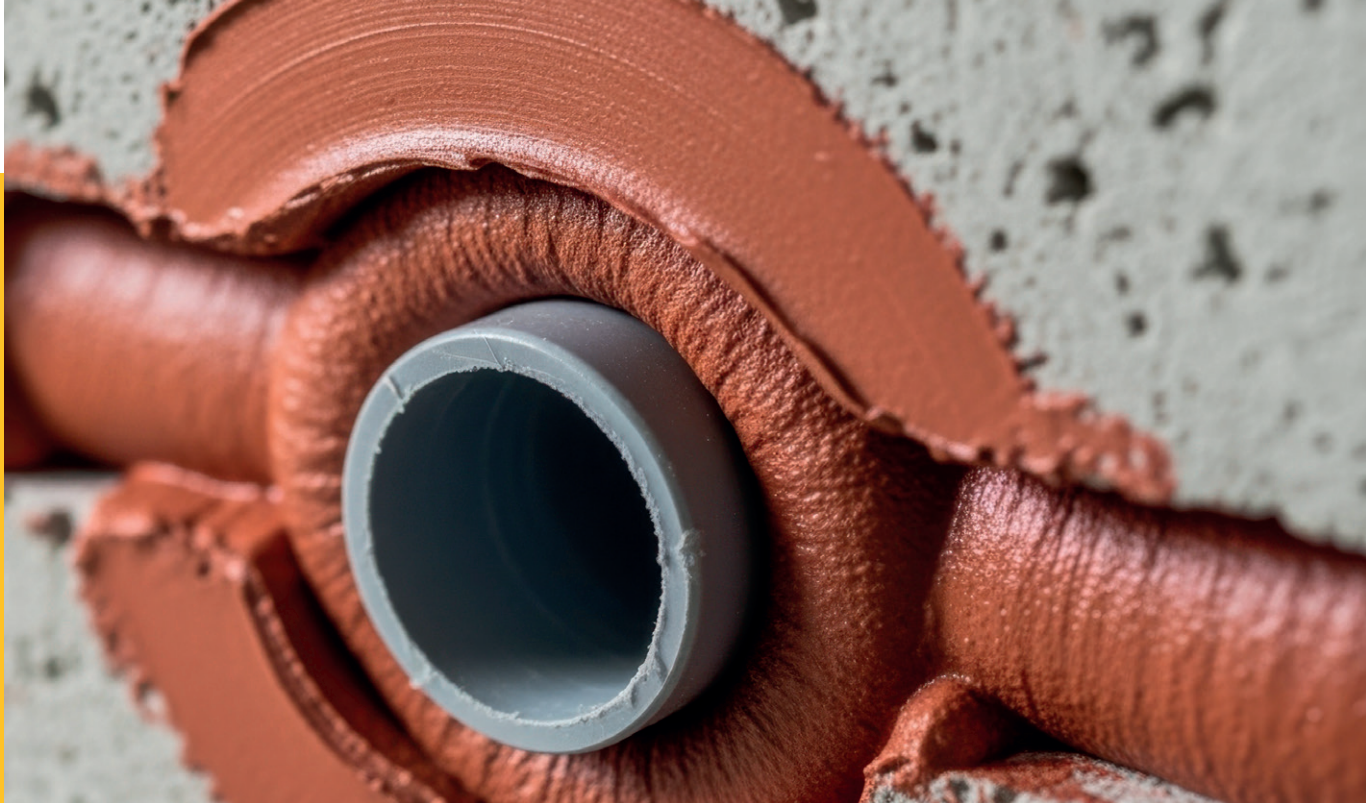

SEALING GAPS. SLOWING FIRE SPREAD. PROTECTING LIVES

Unprotected service penetrations in walls, floors, and ceilings present a significant fire safety risk, allowing fire and smoke to spread rapidly throughout a building. Without effective fire stopping, the integrity of critical fire compartments can be quickly compromised, placing lives, property, and business continuity at serious risk.

We deliver fully compliant passive fire stopping solutions designed to preserve the fire resistance of structural elements and contain fire at its point of origin. Our services cover penetration sealing for pipes, cables, and ductwork, the installation of fire barriers, compartment protection systems, and a full range of structural fire stopping solutions.

All works are carried out by **BM TRADA**-accredited professionals in strict accordance with the latest fire safety standards, ensuring long-term performance, regulatory compliance, and complete peace of mind.

ENSURING FULL LEGAL COMPLIANCE

Every business is legally required to maintain a Fire Risk Assessment, regularly reviewed and updated.

Our fire risk assessors:

- Conduct full site evaluations
- Identify hazards and vulnerabilities
- Provide clear, actionable recommendations
- Produce compliant, audit-friendly reports

We ensure your premises meet all current legislation, giving you confidence, clarity, and compliance.

INDUSTRIES WE SERVE

Our experience across diverse environments allows us to deliver compliant, reliable protection at every scale supporting a wide range of sectors, including

SOCIAL HOUSING

CONSTRUCTION

FACILITIES MANAGEMENT

RETAIL & HOSPITALITY

HEALTHCARE

EDUCATION

MANUFACTURING

COMMERCIAL OFFICES

MULTI-STOREY RESIDENTIAL

HOTELS

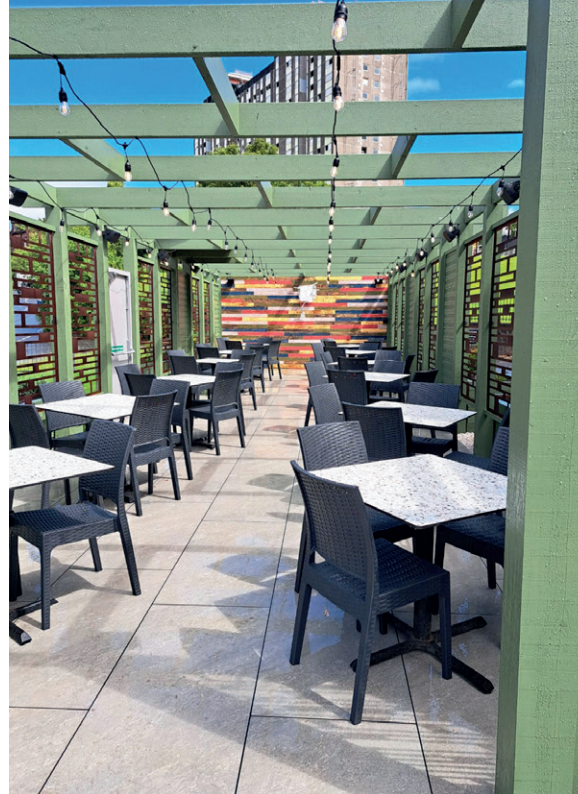

OUR COMMITMENT TO QUALITY

Quality, compliance, and reliability sit at the core of everything we do at Elite Joinery & Fire Protection.

Every project is delivered with meticulous attention to detail, the highest standards of workmanship, and an uncompromising commitment to safety and regulatory excellence. This disciplined approach ensures consistent performance, dependable outcomes, and absolute confidence in every installation.

We provide fully certified installations, precise and transparent reporting, and the expertise of highly trained, fully accredited professionals, all aligned with the latest British Standards, European Standards, and UK Building Regulations.

At every stage of a project, our clients benefit from clear communication, dependable service, and consistent, professional delivery, providing complete assurance from initial consultation through to final certification.

FIBBER MCGEES BAR AND BEER GARDEN RE-FIT

A prominent building on Coatbridge's Main Street, formerly Wetherspoons' Vulcan bar, Fibber McGee's is now a vibrant Irish-themed pub designed to create a welcoming social destination in the town centre.

The project focused on reshaping the large venue into a warm and characterful Irish-style bar while maintaining the flexibility required for high-volume hospitality. More recently, Elite Joinery & Fire Protection completed a bespoke outdoor beer garden, extending the venue with a purpose-built space designed to complement the character of the interior.

Traditional materials, themed décor, integrated lighting and bespoke joinery combine to create a series of comfortable social spaces suited to dining, drinks and live entertainment, providing customers with an inviting experience both inside and out.

REAR ACCESS & ESCAPE ROUTE UPGRADE

Elite Joinery & Fire Protection was appointed to install a certified fire-rated door set as part of a residential fire safety upgrade.

The project improved a rear access point and internal escape route through the installation of a new FD-rated door set, complete with compliant frame, vision panel and overhead self-closing device.

Internally, the door was fitted with panic escape ironmongery, including a push bar mechanism to ensure safe and immediate egress. All elements were installed in accordance with BS 8214 and current UK fire safety standards.

Careful attention was given to correct tolerances, gap sealing and the installation of intumescent and smoke seals to maintain effective compartmentation. Works were completed with minimal disruption while maintaining secure access. The completed installation delivers a compliant, durable solution, significantly enhancing fire protection and safe escape for occupants.

FIRE STOPPING AT COMMERCIAL CAR PARK

Elite Joinery & Fire Protection was appointed to deliver passive fire protection works within a multi-storey commercial car park, helping to enhance the building's fire strategy and long-term safety performance.

The project involved the installation of fire-resistant protection to structural steelwork and service routes, ensuring critical elements were protected in the event of a fire. All works were carried out in accordance with industry best practice and completed within a live environment, maintaining safe access for building users throughout.

The finished installation provides enhanced fire resistance, supports compartmentation and structural integrity, and contributes to the ongoing compliance of the building's passive fire protection systems.

OUR TEAM

Elite Joinery & Fire Protection is built on the strength, knowledge, and professionalism of its people. Our team consists of highly trained passive fire protection specialists with extensive experience across a wide range of sectors and building types.

Every member of our team is fully competent, continuously trained, and committed to delivering work to the highest technical and regulatory standards. This depth of expertise ensures that every project is executed with precision, professionalism, and an uncompromising focus on safety and compliance.
